

Jan deMeer  
IWQoS2005 Publicity Chair  
26/04/2005

Dear Partner,

I would like to inform you on the re-union of the world-wide research society on Middleware and Quality of Service which are supported by the international associations of IFIP, ACM, IEEE and national associations on informatics.

The 13<sup>th</sup> meeting which is hosted by the baroque city of Passau, Germany wants to concentrate on technology and knowledge transfer among scientific and technology-providing communities and enterprises. Culture, as a third aspect of transfer is provided by the city and the charming location between the three rivers Danube, Inn and Ilz.

Therefore, we like to invite CEOs, managers and engineers from industry and economy, small and medium enterprises (SMEs) to demonstrate their economic and technological achievements in the fields of mobile communication, middleware platform capabilities, sensor and actuator technologies, etc. i.e. all the technology by which high service quality must be provided to pervasive computing environments.

The demonstration capabilities provided may include tool or product demonstrations, presentations of simulations or, poster sessions, etc. Exhibitors and Demonstrators should be open to interact with the scientific community during the meeting.

Detailed information on the technical arrangement of the demonstration you'll find in the attached CfP "Technical Part".

Sincerely yours

Jan B. deMeer (IWQoS2005 Publicity Chair)

firstly, call me at @:  
+49 335 56 25 -683 (fone) -671 (fax)  
+49 170 825 1087 (mobile)

secondly, get familiar with my profession @:
